# the Wand®

## Revolutionizing Your Dental Experience

We proudly use The Wand® because we care about:

- **Comfortable, reliable anesthesia**
- **Your peace-of-mind and convenience**
- **The latest technology designed for your well-being**

### No Pressure, No Pain

Did you know that most dental injection pain is actually due to the pressure of the anesthetic injected from a syringe.

With The Wand®, we can carefully control the flow of **anesthetic** so there's no pressure build-up.

**That's why so many of our patients ask "Doctor, did you even use a needle?"**

back cover

## Precise. Comfortable. Proven.

The Wand® uses the latest technology to provide fast, gentle, targeted dental anesthesia and a stress-free dental experience.

If you are pleased with your visit, kindly recommend us to your family and friends.

# Why we use The Wand®

The digital technology of The Wand® is like a computer guidance system that increases your comfort and helps us give you just the right amount of anesthetic in just the right place.

## Increased comfort

With The Wand®, we can control the flow and pressure of anesthetic and ensure a comfortable injection every time.

## Eliminates numb face

The Wand® enables certain techniques which allow you to leave the office with no numbness in your lips, tongue, and cheeks.

## Less stress

When a trip to the dentist is essentially pain-free, future appointments become less stressful **for everyone**, including children and those with dental anxiety.

## Fewer appointments

Because of the precision of The Wand®, we may be able to work on both sides of your mouth at the same time; that means fewer visits and more efficient care.
